AM4023CT

Brand: Dino-Lite Product Code: AM4023CT

Short Description

1.3 Megapixel resolution Connects to C-Mount adapter Advanced software Including measurements

Description

The Dino-Eye AM4023CT USB camera can be mounted to optical devices with a Cmount adapter (not included), like endoscopes or microscopes. The USB interface enables you to quickly install the device on your computer.

With the included DinoCapture software for PC and DinoXcope software for MAC you can easily show live images of your optical device on a monitor or projector and directly record images, videos and time lapse videos. The software also allows you to take measurements and make annotations on recorded images. The Microtouch sensor allows for easily taking a snapshot of the microscopic image. The Dino-Eye AM4023CT is a camera to digitize your existing optical equipment and it therefore does not have a built-

in magnification. The Dino-Eye AM4023CT is a perfect companion for work, clinic, laboratory, on any device that can attach a C-Mount camera.
