AM4115T-JV

Brand: Dino-Lite Product Code: AM4115T-JV

Short Description

1.3 Megapixel resolutionSwitchable UV/IR LEDs20-200x magnificationWith exchangeable caps

Description

The AM4115T-JV features both IR (~940nm) and UV (~395nm) LED lighting in a single device. The Dino-Lite Edge models provide superior image quality and a high level of flexibility due to the adaptable cap design.

Multiple lighting options provide the ability to view magnified objects under normal external lighting sources such as white light or under near IR, or UV lighting by simply switching from one to the other. The IR can be use in document examination and new enhanced UV system provides improved fluorescence contrasting for use in forensics, biomedical or machine vision applications.
